

## Abrasion Resistance Test Results: Comparison of Mühlen Sohn Fluitex® and Albany

Below you can find the abrasion test results of Mühlen Sohn Fluitex® and Albany woven material.  
 The big difference is caused by:

- |  |   |
|--|---|
| 1.) the difference in raw materials:     | Mühlen Sohn uses endless Multifilament yarns<br>Albany uses staple fibre yarns                          |
| 2.) the difference in weaving structure: | Mühlen Sohn covers the weft yarn with the individual warp yarns<br>Albany does not cover the weft yarns |
